**CHICKS DIG IT!**

## No, really. Here's why:

The ButtKicker is a "silent subwoofer" that lets you feel powerful bass without excessive volume.

You can watch a movie, snuggle with your sweetie and still hear yourself think - or even, talk with each other!

No more overly loud subwoofer keeping the kids awake or annoying the neighbors.

The guys can be guys while watching the latest shoot 'em up flick feeling every impact, but the ladies can hold a conversation in the other room without their glasses rattling.
